

# COVID-19 Safety Protocol

Our top priority while addressing our client's plumbing needs is safety. The below listed measures have been established to protect the health and wellness of your family, our family and the community at large while providing quality plumbing services.

- Maintaining the up to date practice of CDC, WHO, local, and state Safety Guidelines with strict adherence.
- Continued development of additional layers of safety measures.
- Daily screening of all employees.
- Pre screening of customers for symptoms prior to service.
- Providing all technicians with gloves, masks, shoe covers, and EPA approved disinfectant supplies.
- New shoe covers and gloves to be worn at every job, and disposed of properly at the completion of the job.
- Maintaining a minimum 6' social distance.
- Frequently washing hands for a minimum of 20 seconds in addition to regular use of hand sanitizer.
- Sanitization of every surface contacted while working.
- Sanitization of all tools, and tool carriers after every job.
- Every service vehicle will be thoroughly fogged with an EPA approved disinfectant at the completion of every work day.
- In addition, we will engage our employees regularly on the importance of a COVID-19 safety compliant lifestyle.

Thank you for understanding. We love our community. We protect our community.
